INDEX TO VOLUME II.

A.

Absorption,
- by crystals in the infra-red, Its dependence on the direction of the plane of polarization, *Merritt*, 244,
- by glass and carbon bi-sulphide, Its relation to spectrophotometer use, 267,
- by solutions, Influence of temperature on, *Nichols and Spencer*, 344.
- in the ultra-violet, *Ernest Nichols*, 302.

Acetone, the solution-tension of silver nitrate in, 97.

Adelbert College, The physical laboratory of, *Whitman*, 53.

Alcohol, solution-tension of metals in, 86.

Allgemeine Eletrizitates-gesellschaft lamp, data concerning the candle power of, 120, 203.

Alternating current curves,
- A method for recording, *Crehore*, 122,
- A phonographic method for recording, *Rollefson*, 141.

American Association for the Advancement of Science, Brooklyn meeting, 227.

Ames, J. S., Frost's *Treatise on Astronomical Spectroscopy*, 308.

Amyl-acetate lamp as a light standard, 2, 28.

Attraction of masses at small distances, *Mackenzie*, 321.

B.

Baker, A. L., Cajori's *History of Mathematics*, 146.

Bauer, L. A.;
- Hellman's *Neudrucke von Schriften und Karten ueber Meteorologie und Erdmagnetismus*, 70.
- Hellman's *Schneekrystalle Beobachtungen und Studien*, 283.

Bauer, L. A. (*continued*):
- On the secular motion of a free magnetic needle, 455.

Bedell, Frederick:
- A study of the residual charges of condensers, 170,
- On magnetic potential, 298,
- Resonance in transformer circuits, 442.

Bliss, W. J. A., The apparent forces between particles immersed in liquids, 241, 373.

Bolometer, construction of, 3, 427.

Bolometric study of light standards, *Sharp and Turnbull*, 1.

Book Reviews:
- Astronomical spectroscopy, *Frost*, 308,
- Controverted questions in geology, *Prestwich*, 480.
- Electro-magnetic theory, *Heaviside*, 152.
- Electrical engineering formulæ, *Geipel and Kilgour*, 159.
- Functions, the theory of, *Harkness*, 157.
- Heat, an elementary text-book, *Glazebrook*, 238.
- Heat, theory of, *Preston*, 154.
- Heat, practical work in, *Woollcombe*, 237.
- Heat, *Wright*, 236.
- Hertz. The work of Hertz and some of his successors, *Lodge*, 397.
- Hydrostatics, elementary, *Greaves*, 316.
- Hydrostatics, a treatise on, *Greenhill*, 229.
- Incandescent lamp, and its manufacture, *Ram*, 158, 240.
- Light, an elementary text-book, *Glazebrook*, 314.
- Magnetische Kreise, deren Theorie und Anwendung, *du Bois*, 311.

Book Reviews (*continued*):
Mathematics, history of, *Cajori*, 146.
Mathematische Physik, *Kirchhoff*, 73.
Mean density of the earth, *Poynting*, 76.
Neudrucke von Schriften und Karten ueber Meteorologie und Erdmagnetismus, *Hellman*, 70.
Oscillations électriques, *Poincaré*, 474.
Photographische Optik, *Miethe*, 400.
Photographic almanac, 400.
Physical laboratory manual, *Chute*, 317.
Physical laboratory manual, *Nichols*, 240.
Physical measurements, practical lessons in, *Earl*, 318.
Physical measurements, an introduction to, *Kohlrausch*, 318.
Physics, practical work in, *Woollcombe*, 317.
Physico-chemical measurements, *Ostwald*, 395.
Ramsay, Sir Andrew Crombie, memoir of, *Geikie*, 480.
Resistance, the measurement of electrical, *Price*, 319.
Schneekrystalle Beobachtungen und Studien, *Hellman*, 233.
Sound, theory of, *Rayleigh*, 471.
Steam engines and other heat engines, *Ewing*, 315.
Theoretical Mechanics, *Ziwet*, 398.
Thermodynamics of reversible cycles, *Pupin*, 239.
Brackett, S. H., On some magnetic characteristics of iridium, 219.

C.

Cajori, F., *A History of Mathematics*, 146.
Calc-spar, attraction between masses of, 330.
Capacity,
of electrolytic condensers, *Sheldon, Leitch, and Shaw*, 401,
On a relation between specific inductive capacity and chemical constitution of dielectrics, *Thwing*, 35.
Carbon bi-sulphide prism, change of refractive index with temperature, 269.
Carcel lamp as a light standard, 1, 17.
Carhart, H. S.;
Electric conductivity of copper as affected by the surrounding medium, 65,
Price's *Treatise on Electrical Resistance*, 319,
University Physics, 478,
Variation of internal resistance of a voltaic cell with current, 392.
Cell, variation of resistance with current, *Carhart*, 392.
Chemical constitution of dielectrics, their relation to specific inductive capacity, *Thwing*, 35.
Child, C. D.;
Lodge's *The Work of Hertz and Some of his Successors*, 397,
Thermal conductivity of copper, 412.
Church, I. P., Greenhill's *Treatise on Hydrostatics*, 229.
Chute, H. N., *A Physical Laboratory Manual*, 317.
Condensers,
The capacity of electrolytic, *Sheldon, Leitch, and Shaw*, 401,
Residual charges of, *Bedell and Kinsley*, 170.
Conductivity, electric,
of certain salt solutions, *MacGregory*, 361,
of copper as affected by the surrounding medium, 61, 66, 67,
of distilled water, 367.
Conductivity, thermal,
of cast iron, *Osmond*, 211,
of copper, *Quick, Child, and Lanphear* 412.
Copper,
electric conductivity, 61, 65, 67,
thermal conductivity, *Quick, Child, and Lanphear*, 412.
Crehore, H. C.;
A method for recording variable current curves, 122,
Resonance in transformer circuits, 442.
Crehore, Mary L., Studies of the lime-light, 161.
Cruto lamp, data concerning the candle power of, 116, 121, 203.

Crystals, absorption of, in the infra-red, as dependent on the direction of the plane of polarization, *Merritt*, 424.
Crystalline masses, on the attraction of, at small distances, 321.
Current curves, method of recording, *Crehore*, 122; *Rollefson*, 141.
Cushman, H. Recent text-books in laboratory physics, 317.

D.

Dielectrics,
their effect on the electric conductivity of copper, 61, 65, 67,
their specific inductive capacity and chemical constitution, *Thwing*, 35,
Residual charges of, *Bedell and Kinsley*, 170.
Diffraction of sound, note on a phenomenon in, *Franklin*, 469.
Dimensions of magnetic potential, *Bedell*, 299.
Discharge along the surface of a solid dielectric, 102.
Du Bois, H., *Magnetische Kreise, deren Theorie und Anwendung*, 311.
Dynamometer invented by Hertz, 36.

E.

Earl, A., *Practical Lessons in Physical Measurements*, 318.
Electric Congress, Proceedings of, 400.
Electric current, its influence on Young's modulus, *Noyes*, 277.
Electric strength, *Pierce*, 99.
Electrolytic condensers, the capacity of, *Sheldon, Leitch, and Shaw*, 401.
Electromotive force at surface of contact, 83, 85.
Energy, distribution of, in the spectrum of the glow-lamp, *Nichols*, 260.
English standard candle as a light standard, 1, 16.
Ewing, J. A., *The Steam Engine and Other Heat Engines*, 315.

F.

Flocculation, 241.
Forces between particles immersed in liquids, *Bliss*, 241.
Franklin, W. S.;
A method for testing magnetic properties, 466,
Note on a phenomenon in diffraction of sound, 469.
Frost, E. B., *A Treatise on Astronomical Spectroscopy*, 308.

G.

Galvanometer, used with bolometer, 7.
Geikie, Sir Archibald, *Memoirs of Ramsay*, 480.
Geipel, W., *Electrical Engineering Formulæ*, 159.
German candle as a light standard, 16.
Glazebrook, R. T.;
Heat, an Elementary Text-book, 238,
Light, an Elementary Text-book, 314.
Glow-lamp,
A general theory of, *Weber*, 112, 197,
The distribution of energy in the spectrum of, *Nichols*, 260.
Goodwin, H. M., Ostwald's *Physico-chemical Measurements*, 395.
Greaves, J., *Elementary Hydrostatics*, 316.
Greenhill, A. G., *A Treatise on Hydrostatics*, 229.

H.

Halley, E., *Isogonic Chart*, 72.
Hallock, W., The photography of manometric flames, 305.
Harkness, J., *A Treatise on the Theory of Functions*, 157.
Harmonic motion, A laboratory experiment in, *Reed*, 56.
Heat, its influence on Young's modulus, *Noyes*, 277.
Heaviside, O., *Electro-magnetic Theory*, 152.
Hefner lamp as a light standard, 2, 17.
Hellman, G.;
Neudrucke von Schriften und Karten ueber Meteorologie und Erdmagnetismus, 70.
Schneekrystalle Beobachtungen und Studien, 233.
Helmholtz, Hermann von, 222.
Hooker, E. H., Greaves' *Elementary Hydrostatics*, 316.

Houston, E. J., Spherical surfaces and their mercatorial projections, 143.
Howard, L., *Clouds, their Modifications*, 72.
Humphreys, W. J., Surface tension of water at low temperatures, 387.
Hutton, F. R., Ewing's *Steam Engine and Other Heat Engines*, 315.

I.

Iceland spar, absorption by, 434.
Incandescent lamp,
Distribution of energy in spectrum of, *Nichols*, 260,
A general theory of, *Weber*, 112, 191.
Infra-red absorption by certain crystals, and its relation to the plane of polarization, *Merritt*, 424.
International Electrical Congress held in Chicago, Proceedings of, 400.
Iridium, magnetic characteristics, *Brackett*, 219.
Iron,
A method of testing its magnetic properties, *Franklin*, 466,
Thermal conductivity of, *Osmond*, 211.
Isotropic masses, their attraction, at small distances, *Mackenzie*, 321.

J.

Jones, H. C., On the solution tension of metals, 81.

K.

Kennelly, A. E., spherical surfaces and their mercatorial projections, 143.
Kilgour, M. H., *Electrical Engineering Formulæ*, 159.
Kimball, A. L., Glazebrook's *Light*, 314.
Kinsley, C., Residual charges of condensers, 170.
Kirchhoff, G., *Vorlesungen ueber mathematische Physik*, 73.
Kohlrausch, F., *An Introduction to Physical Measurements*, 318.
Kundt, August, 68.

L.

Lanphear, B. S., Thermal conductivity of copper, 412.
Leitch, rI. W., The capacity of electrolytic condensers, 401.
Light,
A bolometric study of standards, *Sharp and Turnbull*, 1,
Studies of the lime-light, *M. C. Crehore*, 161.
Lime-light, studies of, *M. C. Crehore*, 161.
Lodge, O., *The Work of Hertz and Some of his Successors*, 397.
Lomb, H. C., Miethe's *Photographische Optik*, 400.

M.

Macfarlane, A.;
Heaviside's *Electro-magnetic Theory*, 152,
Poincaré's *Les Oscillations Electriques*, 474.
MacGregory, A. C., The electric conductivity of certain salt solutions, 361.
Mackenzie, A. S., On the attraction of isotropic and crystalline masses at small distances, 321.
McMahon, J., Rayleigh's *Theory of Sound*, 471.
Magnetic characteristics of iridium, *Brackett*, 219.
Magnetic needle, the secular motion of, *Bauer*, 455.
Magnetic potential, *Bedell*, 298.
Magnetic properties of iron, a new method of testing, *Franklin*, 466.
Manometric flames, The photography of, *Hallock*, 305.
Merritt, Ernest;
On the absorption of certain crystals in the infra-red as dependent on the direction of the plane of polarization, 424,
du Bois' *Magnetische Kreise, deren Theorie und Anwendung*, 311.
Kirchhoff's *Vorlesungen ueber mathematische Physik*, 73.
Metals, their solution-tension, *Jones*, 81.
Methven screen as a light standard, 1, 17.
Methyl alcohol, solution-tension of metals in, 94.
Miethe, A., *Photographische Optik*, 400.

Mohler, J. F., Surface-tension of water at low temperatures, 387.
Molecular conductivity, graphic representation of, 371.
Molecular force, the sphere of, 376.
Morley, F., *A Treatise on the Theory of Functions*, 157.

N.

Newton's law of attraction, experimental test, 334.
Nichols, Ernest, Transmission spectra in the ultra-violet, 302.
Nichols, E. L.;
A laboratory manual of physics, 240,
A new form of spectrophotometer, 138,
August Kundt, 68,
Distribution of energy in the spectrum of the glow-lamp, 260,
Geipel and Kilgour's *Electrical Engineering Formulæ*, 159,
Hermann von Helmholtz, 222,
Studies of the lime light, 161,
The influence of temperature on the transparency of solutions, 334.
Noyes, Mary C., the influence of heat and the electric current upon Young's modulus, 277.

O.

Oils, the electric resistance of, 183.
Osmond, I. T., Thermal conductivity of cast iron, 211.
Osmotic pressure,
its relation to particles in liquids, 255,
of salt solutions, 81.
Ostwald, W., *Manual of Physico-chemical Measurements*, 395.

P.

Paraffin, its electric strength, 100, 107.
Particles, the apparent forces between particles immersed in liquids, *Bliss*, 241, 373.
Pascal, Blaise, *Récit de la Grande Expérience de l'Equilibre des Liqueurs*, 70.
Peirce, L. M., Harkness' *Treatise on the Theory of Functions*, 157.
Phonographic method for recording alternating current curves, *Rollefson*, 141.
Photography,
American Annual of, 400,
of manometric flames, *Hallock*, 305,
Some experiments in electric, *Sanford*, 59.
Photometry; A bolometric study of light standards, *Sharp and Turnbull*, 1.
Physical laboratory at Adelbert College, *Whitman*, 53.
Pierce, G. W., On electric strength, 99.
Planck, M., editor of Kirchhoff's *Vorlesungen ueber mathematische Physik*, 73.
Poincaré, H., *Les Oscillations Électriques*, 474.
Polarization,
magnetic rotation of the plane of, 125,
relation of the absorption of crystals to the plane of, *Merritt*, 424.
Potential,
Magnetic, *Bedell*, 298,
outside a sphere, 339.
Poynting, J. H., *The Mean Density of the Earth*, 76.
Preston, E. D., Poynting's *Mean Density of the Earth*, 76.
Preston, T., *Theory of Heat*, 154.
Prestwick, J., *Controverted Questions in Geology*, 480.
Price, W. A., *A Treatise on the Measurement of Electric Resistance*, 319.
Pupin, M. I., *Thermodynamics of Reversible Cycles*, 239.

Q.

Quartz, absorption of, and its relation to the plane of polarization, 437.
Quick, R. W., Thermal conductivity of copper, 412.

R.

Ram, G. C., *The Incandescent Lamp and its Manufacture*, 158, 240.
Rayleigh, *Theory of Sound*, 471.
Reed, J. O., A laboratory experiment in simple harmonic motion, 56.
Refractive index, change due to particles in liquids, 253.

Residual charges of condensers, *Bedell and Kinsley*, 170.
Resistance,
offered by a medium contained between spherical surfaces, *Houston and Kennelly*, 143,
of electric oils, effect of temperature on, 183,
Variation of internal resistance of cell with current, *Carhart*, 392.
Resonance in transformer circuits, *Bedell and Crehore*, 442.
Reynman, L., *Wetterbüchlein*, 71.
Roberts, E. P., Ram's *Incandescent Lamp and its Manufacture*, 158.
Rogers, F. J.,
Carhart's *University Physics*, 478,
Recent text-books on heat, 336.
Rollefson, C. J., A phonographic method of recording alternate current curves, 141.

S.

Salt solutions, electric conductivity of, *MacGregory*, 361.
Sanford, F.;
Electric photography, 59,
Electric conductivity of copper, 61, 67.
Scheiner, J., translation of *Spectralanalyse der Gestirne*, 308.
Secular motion of a magnetic needle, *Bauer*, 455.
Sharp, C. H., A bolometric study of light standards, 1.
Shaw, A. N., The capacity of electrolytic condensers, 401.
Sheldon, S., The capacity of electrolytic condensers, 401.
Silver nitrate in acetone; its solution-tension, 97.
Slate, F., Preston's *Theory of Heat*, 154.
Solutions,
Electric conductivity of salt solutions, *MacGregory*, 361,
Influence of temperature on transparency of, *Nichols and Spencer*, 344.
Solution-tension of metals, *Jones*, 81.
Sound, Note on phenomena in diffraction of, *Franklin*, 469.
Specific inductive capacity of dielectrics; its relation to their chemical constitution, *Thwing*, 35.
Spectro-bolometer, construction of, 427.
Spectro-photometer, A new form of, *Nichols*, 138.
Spectrum of the glow-lamp, the distribution of energy in, *Nichols*, 260.
Spencer, Mary C., The influence of temperature on the transparency of solutions, 344.
Spherical surfaces and their mercatorial projections, *Houston and Kennelly*, 143.
Sunbeam lamp, data concerning the candle power of, 120, 203.
Surface of contact, difference of potential at, 82, 85.
Surface tension of water at low temperatures, *Humphreys and Mohler*, 387.

T.

Thermal conductivity,
of cast iron, *Osmond*, 211,
of copper, *Quick, Child and Lanphear*, 412.
Thermo-pile used in exploring the spectrum, 268.
Thwing, C. B., Specific inductive capacity and chemical constitution of dielectrics, 35.
Transformer circuits, Resonance in, *Bedell and Crehore*, 442.
Transparency of solutions, The influence of temperature on, *Nichols and Spencer*, 344.
Turmalin, absorption of, 439.
Turnbull, W. R., A bolometric study of light standards, 1.

U.

Ultra-violet, transmission spectra in the, *Ernest Nichols*, 302.

V.

Variable current curves, A method of recording, *Crehore*, 122.
Verdet's constant, 134.
Voltaic cell; variation of resistance, *Carhart*, 392.

W.

Walker, J., translation of Ostwald's *Physico-chemical Measurements*, 395.
Water, its surface tension below zero centigrade, *Humphreys and Mohler*, 387.
Weber, H. S., A general theory of the glow-lamp, 112, 197.
Whitman, F. P., The physical laboratory of Adelbert College, 53.
Woodhouse and Rawson's lamp, data concerning the candle power of, 119, 204.
Woollcombe, W. G.;
Practical Work in General Physics, 317,
Woollcombe, W. G.;
Practical Work in Heat, 237.
Wright, M. R., *Heat*, 236.
Wright, T. W., Ziwet's *Theoretical Mechanics*, 399.

Y.

Young's modulus, The influence of heat and the electric current upon, *Noyes*, 277.

Z.

Ziwet, A., *An Elementary Treatise on Theoretical Mechanics*, 399.
